Rontox baplabay orh

A dense block of text, possibly a list or record, consisting of many lines of characters. The text is written in a cursive or shorthand style, with characters that resemble letters and numbers. The lines are closely packed together, and the overall appearance is that of a detailed record or a list of entries.

Handwritten text in a dense, slanted script, likely a form of shorthand or cipher, covering the majority of the page.

Handwritten text in a dense, slanted script, similar to the left page, covering the majority of the page.

Handwritten text in a cursive script, possibly a form of shorthand or a specific dialect. The text is arranged in approximately 25 horizontal lines, filling most of the page. The characters are small and closely spaced, with some larger characters that may serve as markers or initials.

Handwritten text in a cursive script, similar to the left page. The text is arranged in approximately 25 horizontal lines. The script is dense and consistent throughout the page, with some larger characters interspersed.

Archi septuorox

Handwritten text in a dense, slanted script, likely a musical score or a list of names, covering the majority of the page.

Damporpha nexo gel.

Handwritten text in a dense, slanted script, similar to the left page, covering the majority of the page.

perph geld onchen.

Handwritten text in a dense, slanted script, likely a form of shorthand or a specific dialect. The text is arranged in approximately 25 lines, filling most of the page's width. The characters are small and closely spaced, making the text difficult to decipher without a key.

Ellaxor natoglan.

Handwritten text in a dense, slanted script, similar to the left page. It is arranged in approximately 25 lines, filling most of the page's width. The characters are small and closely spaced, consistent with the shorthand used on the left page.

Car kanal geldons.

Table with 20 columns and 20 rows of handwritten numbers and letters.

Vio nilg onpho.

Table with 20 columns and 20 rows of handwritten numbers and letters.

Toxhencol ylnorox ziborh.

A large grid of handwritten characters, likely a cipher or a code, arranged in approximately 20 columns and 40 rows. The characters are small and densely packed, filling most of the page area. The characters appear to be a mix of letters and symbols, possibly representing a specific cryptographic system.

Balvomp Chipan.

A large grid of handwritten characters, similar to the one on the previous page, arranged in approximately 20 columns and 40 rows. The characters are small and densely packed, filling most of the page area. The characters appear to be a mix of letters and symbols, possibly representing a specific cryptographic system.

Alged on Chipraaxal

Handwritten text in a grid format, consisting of approximately 25 columns and 30 rows of characters. The characters are a mix of lowercase letters and symbols, arranged in a dense, repetitive pattern. The text is written in a cursive or semi-cursive hand, typical of historical cryptographic manuscripts. The grid is enclosed within a rectangular border.

Clarn Nancal

Handwritten text in a grid format, consisting of approximately 25 columns and 30 rows of characters. The characters are a mix of lowercase letters and symbols, arranged in a dense, repetitive pattern. The text is written in a cursive or semi-cursive hand, typical of historical cryptographic manuscripts. The grid is enclosed within a rectangular border.

Lexrox Pingh lardol

Handwritten text in a dense, slanted script, likely a form of shorthand or a specific dialect. The text is arranged in approximately 20 horizontal lines across the page.

Zvrzv Genvox

Handwritten text in a dense, slanted script, similar to the left page. The text is arranged in approximately 20 horizontal lines across the page.

chiromonph Zarcan olinorg

Handwritten text in a dense, vertical script, likely a cipher or stylized alphabet, arranged in approximately 25 columns and 45 rows.

Calgs Sedph panglox

Handwritten text in a dense, vertical script, similar in style to the left page, arranged in approximately 25 columns and 45 rows.

The first table

A large grid of text in a historical cipher system, likely a polyalphabetic cipher, with rows and columns of characters.

The first part of the book is a history of the
 country from the first settlement to the
 present time. It is a very interesting
 and useful work. The second part is a
 description of the country and its
 resources. It is a very valuable
 work. The third part is a history of
 the people of the country. It is a
 very interesting and useful work.

Blank ledger page with a grid structure. The grid consists of a top horizontal line, a bottom horizontal line, and a vertical line on the right side. A dotted horizontal line runs across the page, approximately one-third of the way down from the top. The page is otherwise empty of text or markings.

Blank ledger page with a grid structure. The grid consists of a top horizontal line, a bottom horizontal line, and a vertical line on the left side. A dotted horizontal line runs across the page, approximately one-third of the way down from the top. The page is otherwise empty of text or markings.

Here Tables follow
The Book of Enoch

The Preface of John Michael Galatinus to a Roman. 1701.

There are very many things which induce me to have written this little
more exactly of your Philology, whose Palace we publish, which
had with certain new words, & as much as employment
would permit, to set forth something also concerning
his way of life & his studies, which I scarce find any
satisfactory in Germany. For neither do I believe
they are to be heartily by who do not of both, & utterly deny
if there are any such as many as Philologists, whether
to be a true or a false name, & also the practice
as they call it, to be reputed imaginary. Whether or not
I will not now seriously state, because it easily or strongly
of itself with its own force, & will not approve it
in itself, & in the Chymical Affairs whose glorious names
are every where used of. Why we should doubt of it for
I could not find any true & real cause. They
think they will find, but those writings are one kind
but never of some of them, these are acknowledg'd, as in
themselves, & of some way of writing, & of some way of
proceeding to study of some part of it. Doe easily
There are therefore some amongst of us, who
papers of rain, & some are hard-
gather'd from papers of this Authors own hand writing, & if
you have reason in his teaching, he is rather to be esteem'd
French than British: They think was there for done, &
he might not much more securely by us in France, since it
is certain, I think not by us, that the way of study
my are in a way of condition, & all most
of punishment, to be in a way of condition, & all most
of your condition who endeavour to maintain it
by long Experiments, & to serve to your Country, or by
any other way of higher Parents, but better instructed in
kill of a French Language, so that he therein compare
his chief writings, & of Languages to Divines, have pub-
lish'd under his name, written in your Latin Language, are
to be altogether taken for translations. But who first
and his Books into your English Language is more a curiosity
to be known, than certain & easy to tell. For as conce-
ning this Entrance in your Court Palace of your King

because of most expert we are to judge otherwise
because of most expert follow it took a second care
to correct it in my mind it with new observations
found therefore while I stay in England some men of his
probability of a Philosopher, (whether it be a real or a
borrow Name) had an intercourse by letters with very
many English w^{ch} whether he be himself or by others
not to y^e purpose to know. This is confirmation of my
opinion if I should be able to relate of y^e Pimon
tryst and correspondence with him by letters & several
ways maintained a friendship. It happened once y^e ~~some~~ this
learned it so was ^{by chance} by y^e scholar of an Academy, who
was afterwards ~~in~~ in chains in France, ~~when~~ when he
had in Mr Boyl's presence, hand came into y^e being after
enquiries asked whether he knew Philalthes, ~~off~~ met y^e he
now is private in France. upon hearing w^{ch} news, he desired
to see this man some other in manner, as occasion
would to be transmitted in Paris that, but ~~being in his~~
~~in~~ prevented ~~in his~~ journey by y^e fall
of y^e horse, he rode upon, being thrown to y^e ground
by y^e ~~in~~ in y^e wounds & go by an unhappy mis-
adventure extinguish y^e hope carrying y^e answer to
Philalthes. But there are still more things w^{ch} seem
to give light to this very ~~of~~ Business. For it
is certain y^e known to all who affect with any care
of natural things, y^e there dy^e lately at London a
certain Apothecary ~~and~~ by skill in y^e Chymicall
Art, Starkey by name a man come to my mind e-
nough w^{ch} his writings w^{ch} I shall hereafter menti-
on doe abundantly testify. Of this man therefore there
is a great report, confirmed also by y^e opinion of y^e ~~reputed~~
most famous Mr Boyle himself y^e he was an American
as being born in New-England, where having had y^e
opportunity he had attained to a more intimate friend-
ship with Philalthes w^{ch} was so great y^e Philalthes
more than once came into his Chymicall Shop, & not

set some should y^e most requisite Experiments of our Art,
w^{ch} even seemed in Starkey as a gift some pieces of
God: with w^{ch} when he live splendidly, perhaps as it
happens every arising to become suspected to Philalthes
as if he had intercepted some of his Secrets & unseasonably
by divulged y^e it was at length deserted by him. With
cause move Starkey he pass into Europe, then fore arriv-
ing at London he soon showed some proof of ^{extraordinary}
Chymicall Experiments, w^{ch} either ~~was~~ Philalthes
or w^{ch} he ~~obtained~~ himself, by other means. That which
not to be omitted y^e Starkey published many things w^{ch}
rankly agree with our Master's Opinions, ~~but~~ at least
derived from his fields. ~~For~~ properly from his operations
And he more than once affirmed y^e he both saw Philal-
thes & maintained a sincere friendship with him, & it is
this one thing unhappy y^e is he lived high, & neglected
his household affairs, he underwent a great loss in his
estate & so ~~for~~ that y^e might misgiving. This in-
deed which we thin, y^e Booksellers ~~read~~ ~~confess~~
Truth, where they receive those Books, or in w^{ch} lan-
guage they were writ, this dispute might easily be en-
d: in y^e first place I must publish y^e name of y^e m-
proper a London Bookseller, who took care to print many
things of this Author: But Learning & Birring also were
w^{ch} ignorant whence they see those manuscripts & un-
der w^{ch} name they were ~~delivered~~ to y^e. This was a
warning is to be given, y^e many things have been long
reputed y^e ~~known~~ w^{ch} are not without being common
attributed to Philalthes, such perhaps as y^e Exposition
of Flamed, Artophicus & Sordivogus, of w^{ch} I have will
the occasion to give warning in another place. It will
now w^{ch} be convenient to give add a Catalogue of
Books set forth by Starkey ~~whether~~ at last he
were y^e servant or y^e companion & friend of our

Byronius, in his Philosophical works, of which
 unless we must be sorry if many scarce come to
 our hands, many also are written only in English
 tongue. These indeed Starke chiefly considered himself
 A vindication of his work is Pyrotechnia compo-
 sed in English Tongue. But more of this kind
 have come to our hands, to rehearse here of number
 whereof, we believe will not be ^{useful} ~~useful~~ ^{to} ~~to~~
 to thee, kind Reader, nor trouble some. Namely these
 following are for the most part monuments of his
 ingenuity, which have come to our knowledge.

Pyrotechnia.

a. tho its bowells be filled with the sense of Nature taken away
 for Natures sense being taken away.

b. By this therefore is augmented to nourish whatever is augmented
 to nourish: by the excubation of the radical moisture our Stone
 is nourish to augment, of which he speaks in his Codi. all in
 Ch: of the virtues & doctrine by which error is corrected, & of the
 excubation of it he speaks in his Praxik.

c. for this call the Nature, the Medium, & the Stone, & Mercury,
 & arsenick &c.

d. is the humid Air in the substance of the Spiritually recei-
 ved, until &c.

e. if this is digested by the naturall heat may be totally dissol-
 ved into water

f. And therefore if you would dissolve the frigidities of argen-
 ture, you coagulate it more.

g. as much as it is carryed into Water, with its mercuriall
 dissolved parts.

h. Whence there never is a passing from one extreme to a
 other or one contrary to another, not by a determinate
 disposition, nor is this &c.

k. & rectify the Dry of (not to the moist) (by making ^{humid} ~~humid~~)
 & you will have the Air into a Vapour. Because the Air is
 spiritally intercepted in the matter of Gold & of other
 mixt things. But our compounded matter after &c.

l. Not by fire, but by a wonderfull Virtue.

m. it follows the proper Nature of a metall, because the matter
 is the Nature of a Metall. For this is calld sulphur & it is
 a saucer & pour.

n. in a fourfold proportion, & Luna in a double propor-
 tion because it is cooler than Sol.

o. For Luna tho according to all, it be calld in the second,
 yet it is in the third Degree.

P. And therefore y^e Earth of Sulphur is prepared with
 our Arsenick, as Arsenick with our Sulphur (our Ar
 senick, y^e Earth of Luna: Sulphur y^e Earth of
 Gold) But y^e composition of Sulphur is y^t if it be
 joynt with its Oyl (y^e is Air) with &c.
 Q. in a humid Balneo Mariae. plegmatick, preservative &
 putrefactive with its &c.
 R. of y^e infant, f^r is after y^e sublimation of y^e Sulphur
 y^t y^e best Mess may be given to it, being with all
 its substance, y^t y^e weak body may be more &c.
 S. For our Stone is a simple Body, w^{ch} receives y^e form
 of each thing w^{ch} is joynt to it.

Page	line	Revis
192	1. huius secreto	tam secreta.
	3. Tyronidis	Tyronibus.
